Head and neck imaging

Presentation
A 26-year old lady presented with a painful paramedian anterior neck mass. These are her ultrasound and CT scan images.

Describe the relevant findings and provide the most appropriate clinical diagnosis. Please submit your response to Dr Misser at misser@lakesmit.co.za not later than 11 July 2014. The winning respondent will receive a R1000 award from the RSSA. A detailed diagnosis and discussion will be presented later this year.
