

Appendix 1

Palaearctic migrants ringed at Ngulia Lodge during autumn (October – January¹), 1969–2012

Little Bittern <i>Ixobrychus m. minutus</i> [Palaearctic race].....	8
Black-crowned Night Heron <i>Nycticorax nycticorax</i>	1
Eleonora's Falcon <i>Falco eleonorae</i>	1
Eurasian Hobby <i>Falco subbuteo</i>	2
Levant Sparrowhawk <i>Accipiter brevipes</i>	1
Eurasian Sparrowhawk <i>Accipiter nisus</i>	5
Booted Eagle <i>Aquila pennata</i>	1
Corncrake <i>Crex crex</i>	12
Spotted Crake <i>Porzana porzana</i>	1
Great Snipe <i>Gallinago media</i>	1
Green Sandpiper <i>Tringa ochropus</i>	7
Wood Sandpiper <i>Tringa glareola</i>	13
Common Sandpiper <i>Actitis hypoleucos</i>	1
Common Cuckoo <i>Cuculus canorus</i>	16
Lesser Cuckoo <i>Cuculus poliocephalus</i>	15
Eurasian Scops Owl <i>Otus scops</i>	14
Eurasian Nightjar <i>Caprimulgus europeaus</i>	759
Common Swift <i>Apus apus</i>	2
Eurasian Roller <i>Coracias garrulus</i>	198
Eurasian Bee-eater <i>Merops apiaster</i>	4
Eurasian Wryneck <i>Jynx torquilla</i>	2
Red-backed Shrike <i>Lanius collurio</i>	5391
Isabelline Shrike <i>Lanius isabellinus</i>	2614
Eurasian Golden Oriole <i>Oriolus oriolus</i>	35
Sand Martin <i>Riparia riparia</i>	14
Barn Swallow <i>Hirundo rustica</i>	25 205
Common House Martin <i>Delichon urbicum</i>	600
Red-rumped Swallow <i>Cecropis daurica rufula</i> [Palaearctic race].....	1
River Warbler <i>Locustella fluviatilis</i>	14 047
Savi's Warbler <i>Locustella lusciniooides</i>	2
Basra Reed Warbler <i>Acrocephalus griseldis</i>	2533
Great Reed Warbler <i>Acrocephalus arundinaceus</i>	142
Sedge Warbler <i>Acrocephalus schoenobaenus</i>	258
Eurasian Reed Warbler <i>Acrocephalus scirpaceus</i>	204
Marsh Warbler <i>Acrocephalus palustris</i>	209 727
Olivaceous Warbler <i>Iduna pallida</i>	1394
Upcher's Warbler <i>Hippolais languida</i>	830
Olive-tree Warbler <i>Hippolais olivetorum</i>	2033
Icterine Warbler <i>Hippolais icterina</i>	11
Willow Warbler <i>Phylloscopus trochilus</i>	6367
Common Chiffchaff <i>Phylloscopus collybita</i>	2

¹ In 1974, eight Palaearctic migrants (Garden Warbler 2, Barred Warbler 4 and Irlania 2) were caught and ringed at the Lodge on 3 February; one of the Garden Warblers was subsequently recovered in Jordan, see p. 56.

Wood Warbler <i>Phylloscopus sibilatrix</i>	9
Blackcap <i>Sylvia atricapilla</i>	145
Garden Warbler <i>Sylvia borin</i>	1953
Barred Warbler <i>Sylvia nisoria</i>	2320
Common Whitethroat <i>Sylvia communis</i>	99 462
Thrush Nightingale <i>Luscinia luscinia</i>	105 734
Common Nightingale <i>Luscinia megarhynchos</i>	2388
Irania <i>Irania gutturalis</i>	9089
Rufous Scrub Robin <i>Cercotrichas galactotes</i>	1670
Common Redstart <i>Phoenicurus phoenicurus</i>	13
Whinchat <i>Saxicola rubetra</i>	4
Isabelline Wheatear <i>Oenanthe isabellina</i>	166
Northern Wheatear <i>Oenanthe oenanthe</i>	236
Pied Wheatear <i>Oenanthe pleschanka</i>	131
Common Rock Thrush <i>Monticola saxatilis</i>	553
Spotted Flycatcher <i>Muscicapa striata</i>	3178
Yellow Wagtail <i>Motacilla flava</i>	12
Tree Pipit <i>Anthus trivialis</i>	109
Red-throated Pipit <i>Anthus cervinus</i>	2
Ortolan Bunting <i>Emberiza hortulana</i>	2
Red-backed x Isabelline Shrike hybrid <i>Lanius collurio</i> x <i>L. isabellinus</i>	25
Barn Swallow x Common House Martin hybrid <i>Hirundo rustica</i> x <i>Delichon urbicum</i>	1
Blyth's Reed Warbler x Marsh Warbler hybrid <i>Acrocephalus dumetorum</i> x <i>A. palustris</i>	1
Number of species.....	61
Total.....	499 677

Appendix 2

Recoveries and controls of Palaearctic birds involving Ngulia (to September 2013)

dates: the first is the ringing date, the second the recovery or control date;
recoveries and controls are listed in ringing date order;

km = Great Circle distance in kilometres between ringing and recovery sites;

d = elapsed time in days between ringing and recovery or control;

recovery = reported, found or killed by a member of the public;

control = caught and released by another ringer;

RG = Ringing Group.

Ngulia is at 3°00'S, 38°13'E

Abbreviations

Age when ringed or recovered (EURING codes for Palaearctic migrants)

- 1 pullus, a young bird, unable to fly
- 2 fully grown, year of hatching quite unknown
- 3 hatched during calendar year of ringing
- 4 hatched before calendar year of ringing but exact year unknown
- 5 hatched during previous calendar year
- 6 hatched before previous calendar year but exact year unknown
- 7 definitely hatched two calendar years before ringing or recapture
- 8 hatched more than two calendar years before year of ringing or recapture

Sex

- m male; f female

Condition at recovery

- X found dead
- XF found freshly dead or dying
- XL found dead (not recent)
- + shot or intentionally killed by man
- A alive and probably healthy — fate unknown
- R caught and released by a ringer — a control
- B caught and released by a ringer — a control of a breeding bird
- // condition on finding completely unknown

When the date of recovery is not accurate, “c.”, *circa*, is given before the date

When the date of a recovery reported by letter or email is unknown, the date of the letter or email is given in parentheses

When the date of recovery is completely unknown, the date is given by zeroes

When the ring number is in italics the number has been verified, either by the return of the ring or by a photograph.

***Caprimulgus europaeus* Eurasian Nightjar**

759 ringed: 2 found (1 recovery, 1 control); 1:379; 2 countries

Stockholm	13.11.93	3	Ngulia, 03:00 (Ngulia RG)
4338825	19.05.95	R = m	Chokpak Ornithological Station, Kazakhstan, 42°31'N, 70°38'E, 6015 km, 552 d (Edward Gavrilov)

Chokpak is the most easterly proved recovery site of any Ngulia-ringed bird; also see the Hirundo rustica controls below.

<i>Stockholm</i> 4369213	25.11.93 1995–96	3 X car	Ngulia, 05:30; the bird was of the nominate race (Ngulia RG) Baft, Kerman Province, Iran , 29°12'N, 56°36'E, 4078 km (Parviz Abazari)
-----------------------------	---------------------	------------	---

***Coracias garrulus* Eurasian Roller**
198 ringed: 1 recovery

<i>Nairobi</i> H1332	10.12.86 01.05.89	4 +	Ngulia, night (Ngulia RG) Wadi Maheam, Samail, Oman , 23°18'N, 57°59'E, 3623 km, 873 d (per M. D. Gallagher)
-------------------------	----------------------	--------	---

***Lanius collurio* Red-backed Shrike**

5391 ringed: 2 recoveries; 1:2695; 2 countries

<i>Stockholm</i> 3403353	19.11.95 12.07.96	4 m X	Ngulia, 06:00 (Ngulia RG) near Tbilisi, Georgia , 41°43'N, 44°48'E, 5013 km, 236 d; the finder thought it had been dead “for a couple of weeks” (Zaal Kokaia)
<i>Stockholm</i> 3501228	27.11.02 05.05.06	3 X cat	Ngulia, 06:00 (Ngulia RG, David Murdoch) Tabriz, Iran , 38°05'N, 46°18'E 4640 km, 1255 d (M. Massoud) <i>These two recovery locations are only 373 km apart.</i>

***Lanius isabellinus* Red-tailed Shrike**

2614 ringed: 2 recoveries; 1:1307, 1 country

<i>Nairobi</i> A27566	26.11.76 13.04.79	4 m +	Ngulia (Ngulia RG) 15 km north of Kuwait City, Kuwait , 29°25'N, 48°00'E, 3750 km, 868 d (T. Abbas)
<i>Nairobi</i> A27841	03.12.76 19.04.77	3 +	Ngulia (Ngulia RG) near sea coast, Kuwait , c. 29°N, 48°E, c. 3706 km, 137 d (per Kuwait Science & Natural History Museum)

Both ringed in the same year, recovered in two different years, but both in Kuwait.

***Hirundo rustica* Barn Swallow**

25 205 ringed: 9 found (6 controls, 3 recoveries); 1:2800; 3* countries

<i>Stockholm</i> BL44236	07.12.96 22.09.98	3 R	Ngulia, 09:00 (Ngulia RG) Chokpak Ornithological Station, Kazakhstan , 42°31'N, 70°38'E, 6015 km, 654 d (Edward Gavrilov)
<i>Ozzano</i>	07.09.99	3	Chokpak Ornithological Station, Kazakhstan , 42°31'N, 70°38'E, (Edward Gavrilov)
<i>AE44605</i>	09.12.99	R	Ngulia, 08:40, 6015 km, 93 d (Ngulia RG)
<i>Almaty</i>	29.09.00	3	Chokpak Ornithological Station, Kazakhstan , 42°31'N, 70°38'E, (Edward Gavrilov)
<i>LA01884</i>	04.12.00	R	Ngulia, 11:00, 6015 km, 66 d; the <i>Almaty</i> ring was damaged so re-ringed <i>Stockholm</i> BR48958 (Ngulia RG)
<i>Stockholm</i> BR43277	28.11.00 26.04.02	3 R = 5m	Ngulia, 13:00 (Ngulia RG, Janette Troop) Chokpak Ornithological Station, 15:00, Kazakhstan , 42°31'N, 70°38'E, 6015 km, 514 d (ring <i>Almaty</i> LA09437 added, Edward Gavrilov)
<i>Stockholm</i> BU55551	10.12.01 22.09.03	3 R = 6f	Ngulia, 11:15 (Ngulia RG, Norbert Roothaert) Chokpak Ornithological Station, Kazakhstan , 42°31'N, 70°38'E, 10:00, 6015 km, 651 d (ring <i>Almaty</i> LA20031 added, Edward Gavrilov)
<i>Stockholm</i> CD60362	01.12.05 16.01.06	4 + = f	Ngulia, 13:20 (Ngulia RG, Stuart Sharp) Hombolo dam, Dodoma, Tanzania , 6°00'S, 35°55'E, 420 km, 46 d (Makondo Zachariah)
<i>Stockholm</i> CD65119	03.12.05 00.12.05	3 X	Ngulia, 10:00 (Ngulia RG, DP) Kisoba, near Tukuyu, Tanzania , c. 9°15'S, 33°40'E, 859 km. The ring and a handwritten note were taken to the Museum in Stockholm in May 2009 when the finding date was given as “in December 2005”, thus no elapsed time can be given.

<i>Stockholm</i> CD65766	04.12.05 27.09.06	3 R = f	Ngulia, 12:00 (Ngulia RG, Helen Leach) Chokpak Ornithological Station, Kazakhstan , 42°31'N, 70°38'E, 6015 km, 297 d (Andrey Gavrilov)
<i>Stockholm</i> CD67268	05.12.05 05.03.07	3 X	Ngulia, 12:00 (Ngulia RG, Bernard Amakobe) Satao Camp, Tsavo East National Park, Kenya , 94 km, 455 d, bird hit a table leg and died (Werner Bachman)

The last four were ringed on successive days in a year when over 3000 Barn Swallows were ringed.

*In addition, there have been controls at Ngulia of four Barn Swallows, provenance unknown, which had been marked with unconventional metal rings and fabric threads.

***Locustella fluviatilis* River Warbler**

14 047 ringed: 3 found (1 recovery, 2 controls); 1:4682; 3 countries

<i>Praha</i> T741274	22.05.94 10.12.96	7m R	Piešťany, Trnava, Slovakia , 48°36'N, 17°49'E (P. Kaňuščák)
<i>Stockholm</i> BH00064	17.11.95 08.05.98	3 X wires	Ngulia, 03:00 (Ngulia RG) Gagarin, Smolensk Oblast, Russia , 55°33'N, 35°00'E, 6513 km, 903 d (Moscow RC)
<i>Ljubljana</i> AE48827	30.07.00 02.12.00	3 R	Drava, Vurberk, Ptuj, Slovenia , 46°29'N, 15°47'E (Franc Bracko) Ngulia, 06:00, 5923 km, 125 d (Ngulia RG)

***Acrocephalus griseldis* Basra Reed Warbler**

2533 ringed: 1 recovery

<i>Stockholm</i> 2KE99808	16.12.93 23.08.95	4 //	Ngulia, 07:00 (Ngulia RG) Wadi Wirat, Hawtat Sudayr, Saudi Arabia 180 km N of Riyadh, 26°20'N, 46°20'E, 3781 km, 615 d (Otham Ibrahim)
------------------------------	----------------------	---------	---

Killed on its return migration to Africa.

***Acrocephalus palustris* Marsh Warbler**

209 727 ringed: 142 found (68 recoveries, 74 controls); 1:1477; 28 countries

<i>Nairobi</i> J80501	02.12.72 03.07.75	2 R = f	Ngulia (Ngulia RG, DP) 12 km NE of Schwedt/Oder, Brandenburg, Germany , 53°10'N, 14°22'E, 6626 km, 943 d (ring Hiddensee 9055153 added)
<i>Nairobi</i> J76888	16.12.73 00.05.77	2 //	Ngulia (Ngulia RG, GB and Daphne Backhurst) Al Artawiyah, Saudi Arabia , 26°31'N, 45°21'E, 3368 km, c. 1231 d (Neam Mohmed-Twala)
<i>Nairobi</i> J76873	16.12.73 00.06.75	2 //	Ngulia, day (Ngulia RG, GB and Daphne Backhurst) near Mekhel'ta, Dagestan, Russia , 42°47'N, 46°33'E, 5156 km, c. 531 d (Moscow RC)
<i>Nairobi</i> J85739	20.11.74 23.05.77	2 R	Ngulia, day (Ngulia RG, GB and Daphne Backhurst) Eching, Bayern, Germany , 48°30'N, 12°04'E, 6257 km, 915 d (Max Kasperek)
<i>Nairobi</i> J93652	26.11.74 20.07.75	3 X	Ngulia (Ngulia RG, DP) Klosters, Graubünden, Switzerland , 46°52'N, 9°53'E, 6195 km, 236 d (Stefan Jösler)
<i>Nairobi</i> J42665	26.11.75 01.12.75	2 +	Ngulia (Ngulia RG, GB and DP) Mulanje, Malawi , 16°05'S, 35°29'E, 1484 km, 5 d (<i>per</i> I. F. Kamesa)

The fastest movement of any Ngulia-ringed bird. It was killed by boys.

<i>Nairobi</i> X0667	08.12.75 03.08.78	3 +	Ngulia, morning (Ngulia RG, GB and Daphne Backhurst) Sanaw, Oman , 22°22'N, 58°01'E, 3545 km, 969 d (Mrs M. Issac)
<i>Praha</i>	30.07.76	3	Zahrádky, Novozámecký Pond, Česká Lípa, Czech Republic , 50°38'N, 14°32'E (Zd. Jon)
M707385	19.11.79	R	Ngulia, night, 6372 km, 1207 d (Ngulia RG)

© David Pearson

David Pearson ©

© David Pearson

and at the end of the dry season, 25 October 1974

The newly-opened Lodge, from the southwest, 12 December 1969, showing the extent of the adjacent bush. The 1.5 kW floodlight that caused so much carnage was sited on the highest point of the north-facing wall (*see p. 4*)

© David Pearson

Ringing in the southern bush, 27 November 1979. L-R: Pete Jennings, GB, Anna Forbes-Watson

© David Pearson

Ringing below the 'cliff', 14 November 1991. L-R: Lyndon Roberts, Jerry Lewis, GB, Anna Forbes-Watson

© David Pearson

The Lodge from the west, 17 November 1982, showing the reduced areas of netting bush below the cliff and beside the entrance track. Clearance was to make a football pitch for staff matches. Compare with the first photo on p. 69

© Graeme Backhurst

Ngulia scenes

The Ngulia range from the plains to the northeast (now a rhinoceros sanctuary), 26 October 1984, before the rains. The Taita Hills are in the distance, to the southeast

© Graeme Backhurst

The Lodge from the north after a particularly severe drought, 12 October 2009; from the corner of the 'L'

© Colin Jackson

The Lodge from the north again, 25 November 2003. This shows how thick and lush the bush had become before being much reduced by elephants in the drought year of 2011

© Graeme Backhurst

A heavy afternoon shower approaching the Lodge, 30 November 1997

© Graeme Backhurst

The shrub *Thunbergia holstii*, which flowers after the rains have begun, is an attractive feature of the Ngulia area; 3 December 2008

© Graeme Backhurst

Heavy rain and mist persisted well into the afternoon on 15 December 1985, a day when only four-wheel drive vehicles could reach the Lodge

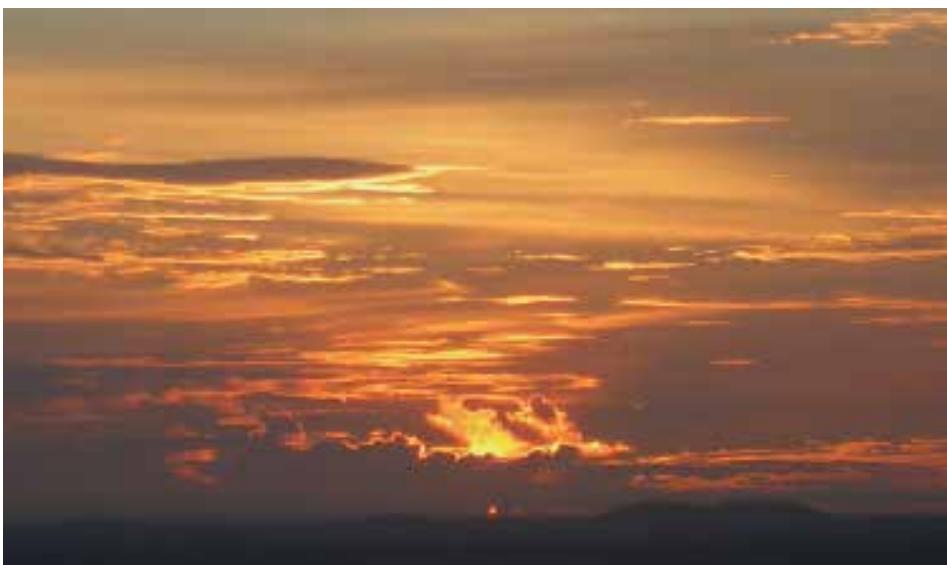

© Marc Hebbelinck

Large numbers of Barn Swallows *Hirundo rustica* perching on trees is a common sight in Tsavo, 21 November 2009

© Franziska Hillig

Raptor observation is often possible. On 27 November 2011 an estimated 26 000 Amur Falcons *Falco amurensis* flew over the Lodge; there are over 200 in this photo. The species has yet to be caught and ringed

© David Pearson

Wonderful sunrises are often a feature of Ngulia, 2 December 2008, after a mist-free night

Night-time activities

© Michel Laplace-Toulouse

Small passerines, Eurasian Rollers *Coracias garrulus* and Cattle Egrets *Bubulcus ibis* perched in the acacia tree on a misty night, 29 November 2008

© Michel Laplace-Toulouse

Extracting birds from the nets below the floodlights, 28 November 2008

© John Cranfield

Ringing at night: insect mayhem,
5 December 2005. L-R: CJ, Mick
Townsend, DP

© Michel Laplace-Toulouse

Extracting birds in swirling mist; most of the illumination comes from one of our 1 kW lamps, seen on its tripod, bottom right; 29 November 2008

© Michel Laplace-Toulouse

Bagged migrants awaiting ringing, 29 November 2008. Each bag contains three small birds and they are arranged on the labelled poles in strict catching order so that they can be ringed with the minimum delay. All night-caught birds are ringed and released before 06:00. Standing, L-R: DP, unknown, Alain Jacot

© Franziska Hillig

Ringing on a quieter night, with very few insects, 8 December 2012. L-R: Peter Kennerley, Richard Seddon, DP

© David Pearson

Mercy Njeri checking the wing formula of an Isabelline Shrike *Lanius isabellinus*, 12 December 2012

Daytime activities

© Michel Laplace-Toulouse

Extracting birds after dawn from the 'L' set of nets, 30 November 2008, a day when almost 2500 migrants were ringed

© Michel Laplace-Toulouse

Nearing the end of a morning session, 29 November 2008. Robyn Boyd scribing for Bernard Amakobe

© David Pearson

The start of a morning's ringing session, showing the bags conveniently suspended from bamboo poles in the old poolside shelter and from one of the ringing tables, 27 November 2005. L-R: GB, Leif Sandgren, Mick Townsend

© Bennie van den Brink

Common House Martins *Delichon urbicum* have occasionally been seen to rest in numbers on the Lodge roof or, as in this case, the acacia in front when they were attracted by taped House Martin calls, 24 November 2006

© Colin Jackson

Poolside ringing, 9 December 2004. L-R: Wanyioke Wamiti, Simon Valle, Francis Argyle, Titus Imboma (back view), Moses Kinuthia, Jonathan Baya

Some winter moulting birds

© David Pearson

Adult Marsh Warbler *Acrocephalus palustris* showing worn wing- and tail-feathers, 13 December 2009,

© Peter Kennerley

Adult male Common Whitethroat *Sylvia communis*, 16 December 2012. A typical *icterops* which has renewed only a few inner primaries

© David Pearson

Adult male Red-backed Shrike *Lanius collurio*, 19 November 2006

© David Pearson

First-winter Olive-tree Warbler *Hippolais olivetorum*, 16 December 2009 showing old flight feathers with moult beginning in the inner primaries

© John Cranfield

A typical first-winter River Warbler *Locustella fluviatilis*, 20 November 2005. The plumage appears unworn although moult is due during January to March

© Peter Kennerley

First-winter Thrush Nightingale *Luscinia luscinia*, 6 December 2012. The unworn plumage would not be replaced until the following July

© John Cranfield

First-winter Common Nightingale *Luscinia megarhynchos* of the distinctive and larger eastern race *golzi*, 8 December 2005

© Peter Kennerley

Adult male Irania *Irania gutturalis* of the normal orange-rufous colour phase, 8 December 2012

© Peter Kennerley

First-winter male Irania *Irania gutturalis*; an example of the unusual white morph, 18 December 2012. The worn, brown wing feathers would not be replaced until the following summer

Autumn moulting birds

© David Pearson

First-winter Great Reed Warbler *Acrocephalus arundinaceus*, 21 December 2009. This young bird has recently completed moult in Africa

© Vincent van der Spek

Adult Basra Reed Warbler *Acrocephalus griseldis*, 20 November 2012. This bird has renewed its entire plumage shortly before reaching Ngulia, probably in Ethiopia

© David Pearson

Upcher's Warbler *Hippolais languida*, 5 December 2013, showing a typical partial moult of the primaries and tail feathers, initiated in autumn

Some ageing features

© John Cranfield

Adult male Barred Warbler *Sylvia nisoria*, 10 December 2005. Adults show a diagnostic clear yellow eye

Adult Marsh Warbler *Acrocephalus palustris*, 5 December 2003. The contrast between old, greyer wing and tail feathers and the newer olive-brown upperpart plumage is a useful ageing character

© Janette Troop

© John Cranfield

First-winter Eurasian Roller *Coracias garrulus*, 4 December 2005. Young birds show unmoulted primaries and a short rounded outer tail feather

Adult River Warbler *Locustella fluviatilis*, 17 December 2009, showing newer outer primaries recently grown in Ethiopia — a valuable ageing character

© David Pearson

Some scarcer Palaearctic migrants and other birds of interest

© Graeme Backhurst

Little Bittern *Ixobrychus minutus* of the nominate race *minutus*, 7 December 1980; only eight have been ringed

© Janette Troop

Only five Eurasian Sparrowhawks *Accipiter nisus* have been ringed; this one was on 2 December 2005

© Graeme Backhurst

The only Levant Sparrowhawk *Accipiter brevipes* to be caught and ringed, 15 November 2012; this bird is a first-winter

© Janette Troop

Only the second Eurasian Hobby *Falco subbuteo* to be ringed, 2 December 2005

© Franziska Hillig

© Graeme Backhurst

© Graeme Backhurst

© David Pearson

© David Pearson

The Eurasian Reed Warbler *Acrocephalus scirpaceus* is a scarce migrant at Ngulia; all belong to the eastern race *fuscus*. In the period under review 204 have been ringed; this newly moulted bird was on 7 December 1986

© David Pearson

The first Common Chiffchaff *Phylloscopus collybita* to be ringed, 7 December 1988. An adult Willow Warbler *P. trochilus* of the grey eastern race *yakutensis* is shown below for comparison, 8 December 2012
